FEATURED INSTRUCTOR

Nick Pellegrino

Nick Pellegrino is an experienced professional as a contractor and as a leader in hydronics training in Canada. Nick sits on the Canadian Hydronics Council and has provided leadership to CHC's Introduction to Hydronics Training School. He has taught many of the more than 700 students that have graduated from this school since its inception.

What the fee includes:

Your fee includes all the material you will need. Bring a pencil and a calculator.

Lunch will be provided both days as part of your registration fee.

School certificate:

Students who successfully complete the school will receive a framed certificate of attendance.

Two - Day School!

Introduction to Hydronic Heating Installations

Participants to the *Introduction to Hydronic Heating Installations* School will gain a basic knowledge of hydronic system fundamentals, including the concept of heat loss calculation. Presented by the Canadian Hydronics Council of the Canadian Institute of Plumbing & Heating, this course is designed to identify some of the fundamental principles related to today's hydronic systems. Relevant topics are covered on an awareness level so entry level installers may gain some information to become more functional when practicing this craft.

This is an entry level course and the starting point for those who are interested in the professional installation of hydronic heating systems. Participants will take from this course basic knowledge of how the design relates to the installation and how to avoid the pitfalls that cause the installation to fail.

What will you learn?

Upon completion of this course you will be able to:

- Introduce basic concepts of heat loss
- Understand the characteristics of various types of boilers
- Correctly interpret manufacturers' instructions and apply the information
- Identify and arrange required boiler trim
- Recognize various piping systems and their applications
- Identify basic types of heat emission systems

Who should attend?

This is recommended for anyone who wants to learn the latest basics in hydronic installation practices: Installers, contractors, designers, wholesalers, manufacturers and agents.

Register now!

Class size is limited and is expected to sell out fast, so register early! **On-site registrations will not be accepted.**

KITCHENER, FEBRUARY 8—9, 2012

Workshop fee - \$349 (\$314.10 for Hydronic Installer Members)
